On Eyeglasses with Blue Blocking
for Healthy Kids Running Series
Participants and Their Families

Remote learning has students experiencing even more screen time on their computers, tablets, and phones, increasing their exposure to man made blue light.

The eye care professionals at South Jersey Eye Associates are concerned that overexposure to blue light may contribute to digital eye strain.

It is possible to reduce blue light exposure by taking regular breaks from digital screens and wearing eyeglasses that reduce glare and filter out blue light.

Schedule a comprehensive eye exam today and speak with one of our caring doctors to determine your child's vision care needs.
